Aircraft Design 3rd Rds Student

RDS win-Student was developed with one purpose in mind - to let students quickly do the mundane analysis tasks so that they can focus upon learning the art and science of aircraft design. In too many engineering colleges, the senior design class becomes an exercise in analysis with a few days spent making a drawing (and for all the wrong reasons), then 95% of the semester spent trying to ...

The companion RDS-STUDENT aircraft design software is a valuable complement to the text. RDS-STUDENT incorporates the design and analysis methods of the book in menu-driven, easy-to-use modules. Like the book, the program is metric-friendly and all inputs and outputs can be interchanged between metric and fps units with the press of a button.

RDS win has its own, integral 3-D CAD module that was developed specifically for the design of new aerospace vehicles. It "knows what an airplane is" and has numerous features that allow rapid creation and modification of aircraft and spacecraft components. A new design can be developed in as little as an hour (1-2 days is more typical).
