*I have a 350 olds and a quadrajjet carb with a mechanical fuel pump. With a fuel pressure guage in line it shows 6 psi when running but when shut down the pressure drops slowly back to zero. Won't the fuel pump hold that pressure in the line with the engine off. Also the fuel enters at the bottom of the bowl so the fuel would drain out then.*

*A carburetor (American English) or carburettor (British English) is a device that mixes air and fuel for internal combustion engines in the proper air-fuel ratio for combustion. It is sometimes colloquially shortened to carb in the UK and North America or carby in Australia. To carburate or carburet (and thus carburation or*

*It is a 4 barrel Rochester Quadrajjet. Answer: If the engine starts at high idle and then dies while it gets warmed, it's possible there is a vacuum leak. If you notice a drop in RPM before it dies, the choke may need adjustment (too tight), the carburetor may be flooding, or the float level is very high.*
